

# **Earthstock Expo - 2022**

## *“Taking Action with Regenerative Solutions”*

### Invitation to Collaborate

Dear Friends of the Earth,

This letter is an invitation to collaborate and participate in the Earthday Los Angeles 52nd Anniversary event on April 22nd - 24th, 2022. This is an invitation based on the current partnership with Green2Gold, Earthstock Enterprises and Golden Road Productions.

The production is a three day event. Friday April 22nd a small reception for the key organizers, producers and organizations in the Los Angeles to meet and have an opportunity to enhance the synergy between us.

On Saturday April 23rd and Sunday April 24th we will produce a small in person event with speakers, music and vendors. These 2 days will be world wide broadcast online, in the virtual world and on other key networks. There will be a limited amount of tickets ( 100 ) to cover expenses and create an expo environment.

We also live in a time where environmental awareness alone is not enough to make the level of changes we need to secure a healthy planet and future for humanity. This year we will focus on “Regenerative Solutions” and taking action to implement and make them available to all regardless of race, religion, ethnicity, gender, age, economic status or bioregion. We need a wholistic full spectrum redesign and innovational projects and products to insure success.

Golden Road Productions is honored to do the heavy lifting and create the space to incubate the next level of collaboration to implement these solutions for our region and global community.

In appreciation  
Michael DiMartino  
Golden Road Productions / Director  
Earthstock Enterprises / Founder & CEO
